

Base Drum Heaters

Base Drum Heaters

Product Description

The base drum heaters are manufactured in all metal construction and have thermostat control for temperature regulation upto 200 deg. C. The heat loads are purposely kept low to provide even and mild heating most of the chemicals. Adhesives require fairly mild heating Standard Base drum heater has approx. 22" diameter over which all types of drums can be kept. Certain materials do require heating from bottom and hence this arrangement is ideal.

Features

- ▶ Completely mobile due to castor wheels
- ▶ Individual temp controller
- ▶ Effective bottom heating
- ▶ Can also be used a pre heating option

Application

- ▶ It is generally used as an add on with the vertical drum heater
