

Brass Cast Heaters

Brass Cast Heaters

Product Description

Brass casting heaters are used over the aluminium cast heaters due to its high operating temperatures, or where temperature requirements are above 450 Deg C, these are typically used in twin screw extruder barrels in compounding and plastic resin manufacturing applications.

Features

- ▶ Liquid cooled or air cooled specifications
- ▶ Single or three phase circuit
- ▶ Choice of termination
- ▶ Uniform surface temperature
- ▶ Cylindrical or platen shapes or other customized shapes possible
- ▶ Operating temp beyond 450 Deg C

Application

- ▶ Extruder heating
- ▶ Plastic processing industry
- ▶ Food service industry
- ▶ Engineering industry
